

Stress and anxiety can
start to feel like
something that always
needs to be fixed.

Patterns: Lived
Experiences +
Observations

Mental-health ads can
make treatment
look simple and
straightforward.

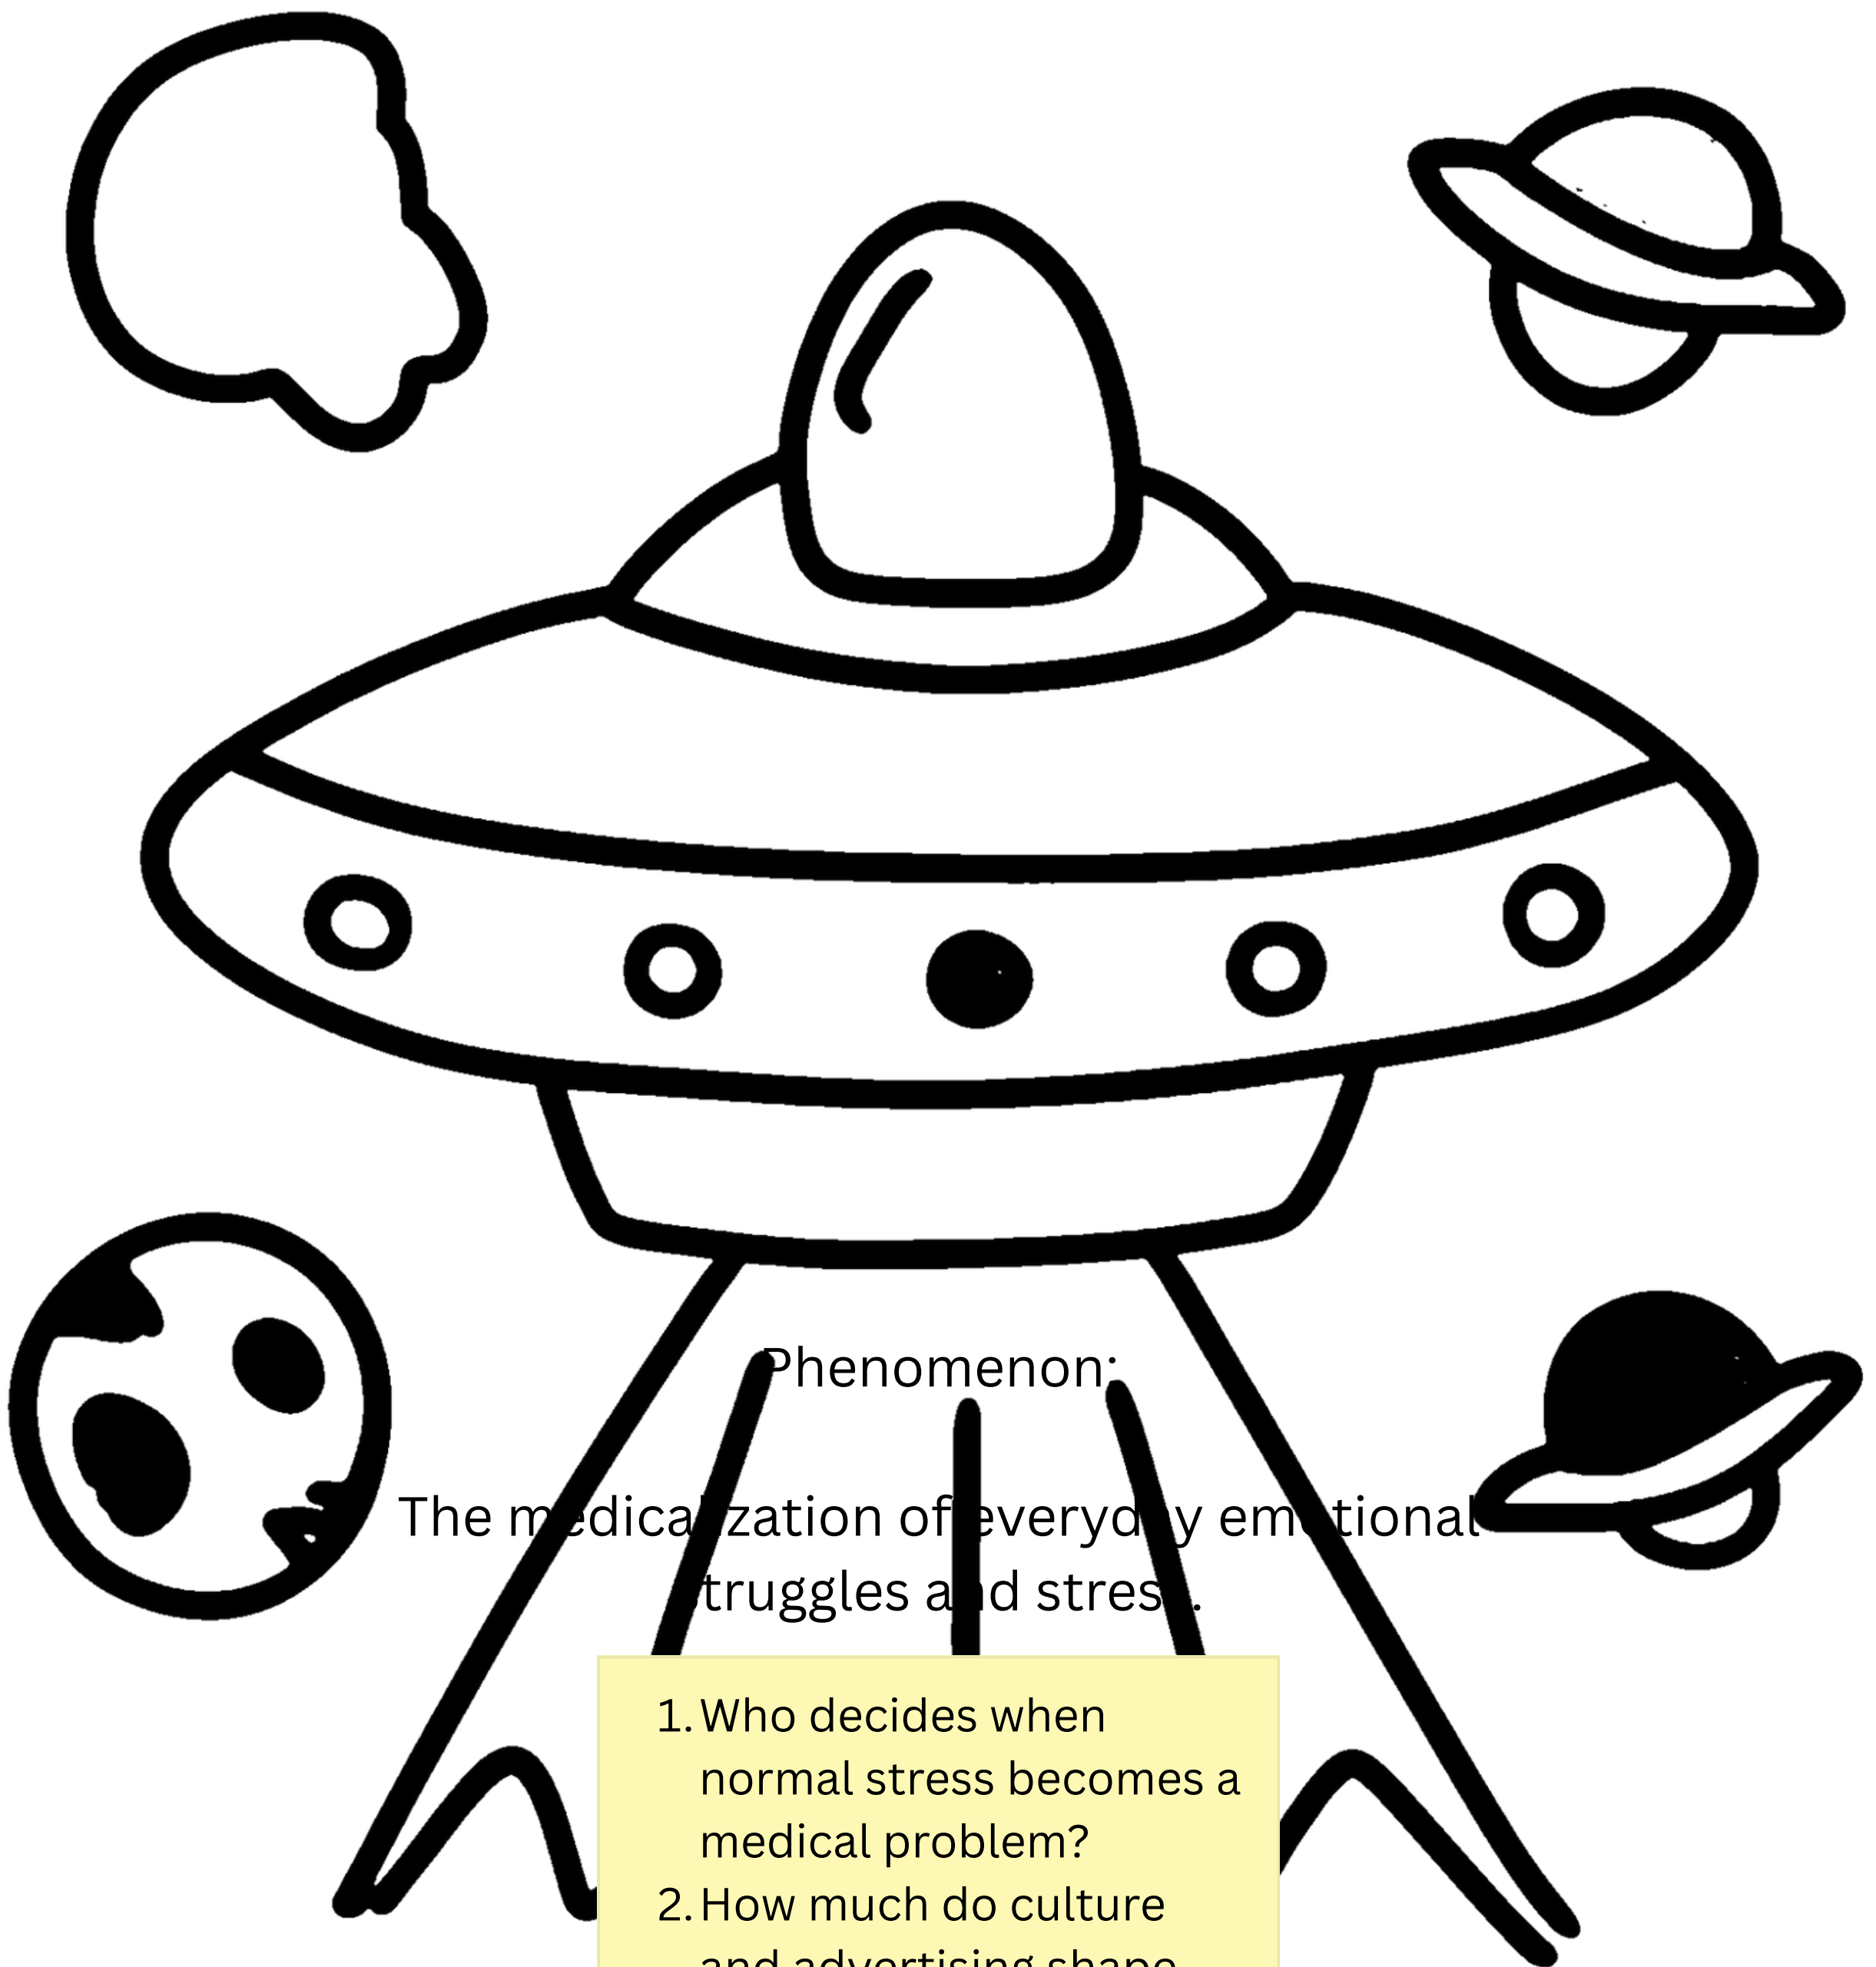

Doctors and
medication often seem
like the most trusted
solution.

Social pressure or life circumstances can get
ignored when
symptoms are treated only as medical
problems.

Stress and anxiety can start to feel like something that always needs to be fixed.

Mental-health ads can make treatment look simple and straightforward.

Phenomenon:

The medicalization of everyday emotional struggles and stress.

- 1. Who decides when normal stress becomes a medical problem?
- 2. How much do culture and advertising shape the way we understand mental illness?
- 3. When does treatment help, and when can it oversimplify what someone is going through?

Doctors and medication often seem like the most trusted solution.
